Subject Index to Volume 60

ABDOMINAL OBESITY
  study of the Metabolic Syndrome, 335–337 (Oct)
ACUTE DEFICIENCY
  acute *versus* marginal deficiencies of nutrients, 277–280 (Sep)
ADIPOCYTE HORMONE
  function of leptin in nutrition, weight, and physiology, S1–S14 (Oct)
ADIPOCYTES
  glucocorticoids in adipocytes stimulate visceral obesity, 148–151 (May)
ADIPOSE TISSUE
  leptin and reproduction, S39–S46 (Oct)
ADIPOSITY
  leptin and insulin action in the central nervous system, S20–S29 (Oct)
ADOLESCENCE
  obesity is not protective for bones in childhood and adolescence, 27–30 (Jan)
ADULT CHRONIC DISEASE
  effect on fetal growth and outcome of pregnancy, S35–S39 (May)
ADVERSE HEALTH EFFECTS
  malnutrition and excess mortality in Shangri-La, 59–65 (Feb)
AGE-RELATED EYE DISEASE STUDY
  age-related eye disease study (AREDS), 283–288 (Sep)
AGE-RELATED MACULOPATHY
  age-related eye disease study (AREDS), 283–288 (Sep)
AGRICULTURAL PRODUCTION
  improvement of human nutrition using genetically engineered crops, 135–141 (May)
AIDS
  vitamin B_{12} deficiency, tumor necrosis factor-α, and epidermal growth factor, 142–144 (May)
ALCOHOL
  effects of alcohol, estrogen, and phytoestrogens on high-density lipoproteins, 1–7 (Jan)
  severe hyperhomocysteinemia caused by alcohol abuse, 215–221 (Jul)
ALZHEIMER'S
  vitamin B_{12} deficiency, tumor necrosis factor-α, and epidermal growth factor, 142–144 (May)
ANABOLIC
  leptin and insulin action in the central nervous system, S20–S29 (Oct)
ANEMIA
  iron fortification of flours in Venezuela, S26–S29 (Jul)
  prepregnancy and pregnancy nutrition and its impact on women's health, S64–S67 (May)
  why anemic individuals are anemic, 91–96 (Mar)
ANGIOGENESIS
  peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
ANIMAL INDUSTRY
  negative impact of antimicrobial use in animals on humans, 261–264 (Aug)
ANIMAL PROTEIN
  elderly women need dietary protein to maintain bone mass, 337–341 (Oct)
ANTERIOR PITUITARY GLAND
  thyroid-stimulating hormone of the anterior pituitary gland, 374–377 (Nov)
ANTIBIOTICS
  negative impact of antimicrobial use in animals on humans, 261–264 (Aug)
ANTIMICROBIAL
  hepcidin and regulation of dietary iron, 371–374 (Nov)
  negative impact of antimicrobial use in animals on humans, 261–264 (Aug)
ANTIOXIDANTS
  modulation of monocyte-macrophage function with α-tocopherol, 8–14 (Jan)
ARAB
  dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)
ASCORBATE
  roles of vitamins E and C on neurodegenerative diseases and cognitive performance, 308–326 (Oct)
ASCORBIC ACID
  gastric cancer in *Helicobacter pylori*–infected populations when using vitamin C, 34–36 (Jan)
  iron absorption from iron-fortified food, S7–S15 (Jul)
ASSESSING INTAKES
  using new dietary reference intakes to assess diets, 267–275 (Sep)

ATHEROSCLEROSIS
malnutrition, inflammation, and atherosclerosis in ESRD, 378–387 (Nov)
ATHEROSCLEROTIC RISK FACTORS
study of the Metabolic Syndrome, 335–337 (Oct)
α-TOCOPHEROL
modulation of monocyte-macrophage function with α-tocopherol, 8–14 (Jan)
roles of vitamins E and C on neurodegenerative diseases and cognitive performance, 308–326 (Oct)
AUTOIMMUNE DISORDER
mortality in patients with celiac disease, 116–118 (Apr)
BACTERIAL INFECTIONS
choriodecidual infection and preterm birth, S19–S25 (May)

BACTERIAL SUBTYPING METHODS
subtyping of bacterial foodborne pathogens, 201–208 (Jul)
β-CAROTENE
effect of β-carotene and exposure to cigarette smoke on lungs of ferrets, 88–90 (Mar)
influence of dietary fat on β-carotene absorption and bioconversion into vitamin A, 104–110 (Apr)
BERIBERI
acute *versus* marginal deficiencies of nutrients, 277–280 (Sep)
11β-HYDROXYSTEROID DEHYDROGENASE
glucocorticoids in adipocytes stimulate visceral obesity, 148–151 (May)
BILE ACIDS
intestinal bile acids can bind to and activate the vitamin D receptor, 281–283 (Sep)
BIOTECHNOLOGY
improvement of human nutrition using genetically engineered crops, 135–141 (May)
BLOOD PRESSURE
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
BODY WEIGHT
obesity is not protective for bones in childhood and adolescence, 27–30 (Jan)
BONE LOSS
review of the experimental and epidemiologic data regarding high-protein weight-loss diets, 189–200 (Jul)
BONE MASS
kidney stones in patients with low calcium intakes, 212–214 (Jul)
BONE MINERAL CONTENT
obesity is not protective for bones in childhood and adolescence, 27–30 (Jan)
BONE MINERAL DENSITY
elderly women need dietary protein to maintain bone mass, 337–341 (Oct)

BRAIN TARGETS AND PERIPHERAL SIGNALS
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
BREAST MILK
validity of measuring milk intake in infant feeding, 235–251 (Aug)

CALCIUM
comeback of nutritional rickets, 111–115 (Apr)
iron and calcium bioavailability of fortified foods and dietary supplements, 360–367 (Nov)
CAMPYLOBACTER
negative impact of antimicrobial use in animals on humans, 261–264 (Aug)
CANCER INCIDENCE
insights on milk consumption and chronic disease risk, 180–182 (Jun)
CANCERS
epidemiology and nutritional approaches in using olive oil, 170–176 (Jun)
CARBOHYDRATE
effects of carbohydrate on food intake, 155–169 (Jun)
CARDIOVASCULAR DISEASE
effects of alcohol, estrogen, and phytoestrogens on high-density lipoproteins, 1–7 (Jan)
modulation of monocyte-macrophage function with α-tocopherol, 8–14 (Jan)
CAROTENOIDS
influence of dietary fat on β-carotene absorption and bioconversion into vitamin A, 104–110 (Apr)
CATABOLIC SIGNALING
leptin and insulin action in the central nervous system, S20–S29 (Oct)
CATARACTS
age-related eye disease study (AREDS), 283–288 (Sep)
CELIAC DISEASE
mortality in patients with celiac disease, 116–118 (Apr)
CEREAL FORTIFICATION
cereal flour fortification, 391–406 (Dec)
CHILDHOOD
obesity is not protective for bones in childhood and adolescence, 27–30 (Jan)
CHILDREARING
development of eating behavior and nutrition status, S95–S101 (May)
CHOLESTEROL
effects of alcohol, estrogen, and phytoestrogens on high-density lipoproteins, 1–7 (Jan)
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
CHORIOAMNION
choriodecidual infection and preterm birth, S19–S25 (May)

CHRONIC INFLAMMATION
malnutrition, inflammation, and atherosclerosis in ESRD, 378–387 (Nov)
CIGARETTE SMOKE
effect of β-carotene and exposure to cigarette smoke on lungs of ferrets, 88–90 (Mar)
CIRCADIAN RHYTHM
three vitamins are involved in regulation of the circadian rhythm, 257–260 (Aug)
CIRRHOSIS
pathogenesis and the role of antioxidants in nonalcoholic fatty liver disease, 289–293 (Sep)
9-*CIS*-RETINOIC ACID
thyroid-stimulating hormone of the anterior pituitary gland, 374–377 (Nov)
COGNITION
roles of vitamins E and C on neurodegenerative diseases and cognitive performance, 308–326 (Oct)
COLON
intestinal bile acids can bind to and activate the vitamin D receptor, 281–283 (Sep)
COLON AND RECTAL CARCINOGENESIS
insights on milk consumption and chronic disease risk, 180–182 (Jun)
COLON CANCER RISK
immune-stimulating and gut health–promoting properties of short-chain fructo-oligosaccharides, 326–334 (Oct)
COMBINED ANTIOXIDANTS
vitamin supplementation used in heart transplant patients, 368–377 (Nov)
COPPER EFFLUX MECHANISMS
understanding copper uptake at the molecular level, 177–186 (Jun)
CORN FLOUR FORTIFICATION
iron fortification in Central America, S30–S33 (Jul)
CORONARY ARTERIOSCLEROSIS
vitamin supplementation used in heart transplant patients, 368–377 (Nov)
CORONARY HEART DISEASE
epidemiology and nutritional approaches in using olive oil, 170–176 (Jun)
novel transporters involved in the regulation of sterol absorption and excretion, 30–33 (Jan)
COUNTERREGULATORY RESPONSES
role of leptin in the control of body weight, S15–S19 (Oct)
CRYPTOCHROME RETINOL
three vitamins are involved in regulation of the circadian rhythm, 257–260 (Aug)
CTR1
understanding copper uptake at the molecular level, 177–186 (Jun)
CU-ATP-ASE GENES
understanding copper uptake at the molecular level, 177–186 (Jun)
CYTOCHROME CYP3A
intestinal bile acids can bind to and activate the vitamin D receptor, 281–283 (Sep)
CYTOKINES
cytokines in regulating protein metabolism and muscle function, 39–51 (Feb)

DAIRY
insights on milk consumption and chronic disease risk, 180–182 (Jun)
DENTAL CARIES
development of dental caries due to cheese consumption, 97–103 (Apr)
DENTAL DECAY
development of dental caries due to cheese consumption, 97–103 (Apr)
DIABETES
effect on fetal growth and outcome of pregnancy, S35–S39 (May)
glucocorticoids in adipocytes stimulate visceral obesity, 148–151 (May)
DIET
adverse effects of poor micronutrient status during childhood and adolescence, S84–S90 (May)
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
DIETARY FAT
influence of dietary fat on β-carotene absorption and bioconversion into vitamin A, 104–110 (Apr)
DIETARY INTAKE
approaches to intervention among children and adolescents, S118–S125 (May)
DIETARY MODIFICATION
dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)
DIETARY PROTEIN
review of the experimental and epidemiologic data regarding high-protein weight-loss diets, 189–200 (Jul)
DIETARY REFERENCE INTAKES
using new dietary reference intakes to assess diets, 267–275 (Sep)
1,25-DIHYDROXYVITAMIN D_3
intestinal bile acids can bind to and activate the vitamin D receptor, 281–283 (Sep)
DOUBLY LABELED WATER
validity of measuring milk intake in infant feeding, 235–251 (Aug)
DRIs
using new dietary reference intakes to assess diets, 267–275 (Sep)
DRUG RESISTANCE
negative impact of antimicrobial use in animals on humans, 261–264 (Aug)

DYSLIPIDEMIA
glucocorticoids in adipocytes stimulate visceral obesity, 148–151 (May)
study of the Metabolic Syndrome, 335–337 (Oct)

EATING BEHAVIORS
children's food acceptance patterns, S91–S94 (May)
development of eating behavior and nutrition status, S95–S101 (May)
ECLAMPSIA
maternal nutrition, health, and survival, S59–S63 (May)
ELEMENTAL IRON
cereal flour fortification, 391–406 (Dec)
EMBRYOGENESIS
involvement of inositol in reproduction, 80–87 (Mar)
END-STAGE RENAL DISEASE
malnutrition, inflammation, and atherosclerosis in ESRD, 378–387 (Nov)
ENERGY BALANCE
defining the role of leptin in humans, S30–S34 (Oct)
function of leptin in nutrition, weight, and physiology, S1–S14 (Oct)
role of leptin in the control of body weight, S15–S19 (Oct)
ENERGY EXPENDITURE
thermic effect of food is reduced in obesity (letter to the editor), 295–297 (Sep)
thermic effect of food is reduced in obesity (response from the author), 299–300 (Sep)
ENERGY INTAKE
review of the experimental and epidemiologic data regarding high-protein weight-loss diets, 189–200 (Jul)
ENTEROCOCCUS
negative impact of antimicrobial use in animals on humans, 261–264 (Aug)
ENTEROCYTE
molecular function of HFE in hereditary hemochromatosis provide insights into the control of intestinal iron absorption, 144–148 (May)
ENVIRONMENTAL POLLUTION
workshop on nutrition and health of women, infants, and children, S1 (May)
EPIDEMIOLOGY
subtyping of bacterial foodborne pathogens, 201–208 (Jul)
EPIDERMAL GROWTH FACTOR
vitamin B_{12} deficiency, tumor necrosis factor-α, and epidermal growth factor, 142–144 (May)
ESSENTIAL HYPERTENSION
study of the Metabolic Syndrome, 335–337 (Oct)
ESSENTIAL METALS
cellular transporters for zinc, 121–124 (Apr)

ESTROGEN
effects of alcohol, estrogen, and phytoestrogens on high-density lipoproteins, 1–7 (Jan)

FAT
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
FATTY ACIDS
n-3 polyunsaturated fatty acids on risk reduction of sudden death, 407–409 (Dec)
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
FERTILITY
involvement of inositol in reproduction, 80–87 (Mar)
FETAL DEVELOPMENT
involvement of inositol in reproduction, 80–87 (Mar)
FETUS
leptin and undernutrition, S56–S67 (Oct)
FIELD SETTINGS
measurement of nutrition impact of laboratory methods to enhance nutrition research, S126–S131 (May)
FOLATE
dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)
FOLATE DEFICIENCY
homocysteine, folate deficiency, and Parkinson's disease, 410–413 (Dec)
FOLIC ACID
acute *versus* marginal deficiencies of nutrients, 277–280 (Sep)
FOODBORNE PATHOGENS
subtyping of bacterial foodborne pathogens, 201–208 (Jul)
FOOD CONSUMPTION PATTERNS
children's food acceptance patterns, S91–S94 (May)
FOOD FORTIFICATION
history and future of food fortification in the United States, 15–26 (Jan)
iron compounds for food fortification, S50–S61 (Jul)
FOOD INTAKE
effects of carbohydrate on food intake, 155–169 (Jun)
FOOD SAFETY
subtyping of bacterial foodborne pathogens, 201–208 (Jul)
FOOD SCARCITY
adverse outcomes of poor micronutrient status in childhood and adolescence, S77–S83 (May)
FOOD SECURITY
innovative strategy to combat malnutrition in India, S102–S108 (May)

FORTIFICATION
dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)
fortification strategies to combat zinc and iron deficiency, 52–58 (Feb)
iron and calcium bioavailability of fortified foods and dietary supplements, 360–367 (Nov)
FORTIFICATION STRATEGIES
food iron absorption and its importance for design of food fortification strategies, S3–S6 (Jul)
FRUCTOSE
role of glucokinase in the control of hepatic glucose uptake and storage as glycogen, 253–257 (Aug)
FUNCTIONAL FOOD
epidemiology and nutritional approaches in using olive oil, 170–176 (Jun)

GASTRIC CANCER
gastric cancer in *Helicobacter pylori*–infected populations when using vitamin C, 34–36 (Jan)
GASTROINTESTINAL SIGNALS
effects of carbohydrate on food intake, 155–169 (Jun)
GENETIC PREDISPOSITION
type 1 diabetes mellitus results from decreased insulin production, 182–186 (Jun)
GLOBAL NUTRITION
overview of global situation in health and nutrition in women, infants, and children, S7–S13 (May)
GLUCAGON-LIKE PEPTIDE-1
effects of carbohydrate on food intake, 155–169 (Jun)
GLUCOCORTICOIDS
glucocorticoids in adipocytes stimulate visceral obesity, 148–151 (May)
GLUCOKINASE
role of glucokinase in the control of hepatic glucose uptake and storage as glycogen, 253–257 (Aug)
GLUTEN
mortality in patients with celiac disease, 116–118 (Apr)
GLYCOGEN STORAGE
role of glucokinase in the control of hepatic glucose uptake and storage as glycogen, 253–257 (Aug)
GOVERNMENT REGULATION
history and future of food fortification in the United States, 15–26 (Jan)
GROWTH SUPPLEMENTS
negative impact of antimicrobial use in animals on humans, 261–264 (Aug)

HELICOBACTER PYLORI
gastric cancer in *Helicobacter pylori*–infected populations when using vitamin C, 34–36 (Jan)
HEPATIC GLUCOSE UPTAKE
role of glucokinase in the control of hepatic glucose uptake and storage as glycogen, 253–257 (Aug)
HEPCIDIN
hepcidin and regulation of dietary iron, 371–374 (Nov)
HEREDITARY HEMOCHROMATOSIS
molecular function of HFE in hereditary hemochromatosis provide insights into the control of intestinal iron absorption, 144–148 (May)
HFE
molecular function of HFE in hereditary hemochromatosis provide insights into the control of intestinal iron absorption, 144–148 (May)
HIGH-DENSITY LIPOPROTEINS
effects of alcohol, estrogen, and phytoestrogens on high-density lipoproteins, 1–7 (Jan)
HIGH-PROTEIN DIET
review of the experimental and epidemiologic data regarding high-protein weight-loss diets, 189–200 (Jul)
HIV INFECTION
effect on fetal growth and outcome of pregnancy, S26–S34 (May)
role of micronutrients and microorganisms in the development of immunocompetence, S68–S72 (May)
HOMEOSTASIS
hepcidin and regulation of dietary iron, 371–374 (Nov)
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
HOMOCYSTEINE
homocysteine, folate deficiency, and Parkinson's disease, 410–413 (Dec)
HOMOCYSTEINE METABOLISM
severe hyperhomocysteinemia caused by alcohol abuse, 215–221 (Jul)
HOMOZYGOUS MUTATIONS
defining the role of leptin in humans, S30–S34 (Oct)
HUMAN MILK
validity of measuring milk intake in infant feeding, 235–251 (Aug)
HUMAN STUDIES
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
HYPERCHOLESTEROLEMIA
novel transporters involved in the regulation of sterol absorption and excretion, 30–33 (Jan)
HYPERHOMOCYSTEINEMIA
severe hyperhomocysteinemia caused by alcohol abuse, 215–221 (Jul)
HYPERINSULINEMIA
study of the Metabolic Syndrome, 335–337 (Oct)
HYPERPHAGIA
defining the role of leptin in humans, S30–S34 (Oct)

HYPERTENSION
maternal nutrition, health, and survival, S59–S63 (May)

IL12B GENE
type 1 diabetes mellitus results from decreased insulin production, 182–186 (Jun)
IMMUNE PROCESSES
zinc nutrition and HIV infection, 69–79 (Mar)
IMMUNE SYSTEM
role of leptin in immunology, S35–S38 (Oct)
IMMUNOCOMPETENCE
role of micronutrients and microorganisms in the development of immunocompetence, S68–S72 (May)
INDIA
control of micronutrient deficiencies in India, S73–S76 (May)
research priorities child and maternal nutrition, S14–S18 (May)
workshop on nutrition and health of women, infants, and children, S1 (May)
INDIRECT CALORIMETRY
results concerning whether the thermic effect of food is reduced in obesity, 223–233 (Aug)
INFANT FEEDING PATTERNS
infant feeding styles, S109–S114 (May)
INFANT MORTALITY
multiple micronutrient supplementation in pregnancy, S2–S6 (May)
INFANTS
supplementing infants with vitamin D might prevent type 1 diabetes, 118–121 (Apr)
INFECTIOUS DISEASE
micronutrient malnutrition, infection, and immunity, S40–S45 (May)
INOSITOL
involvement of inositol in reproduction, 80–87 (Mar)
INSULIN
leptin and insulin action in the central nervous system, S20–S29 (Oct)
INSULIN RESISTANCE
study of the Metabolic Syndrome, 335–337 (Oct)
INTERLEUKIN 2
role of leptin in immunology, S35–S38 (Oct)
INTESTINAL CHOLESTEROL ABSORPTION AND EXCRETION
novel transporters involved in the regulation of sterol absorption and excretion, 30–33 (Jan)
INTESTINAL IRON ABSORPTION
molecular function of HFE in hereditary hemochromatosis provide insights into the control of intestinal iron absorption, 144–148 (May)
INTRAVENOUS ULTRASOUND
vitamin supplementation used in heart transplant patients, 368–377 (Nov)

IODINE DEFICIENCY DISORDERS (IDD)
prevalence of micronutrient malnutrition worldwide, S46–S52 (May)
IRON
fortification strategies to combat zinc and iron deficiency, 52–58 (Feb)
hepcidin and regulation of dietary iron, 371–374 (Nov)
iron and calcium bioavailability of fortified foods and dietary supplements, 360–367 (Nov)
plant-based diets reduces dietary iron and zinc absorption, 127–134 (May)
IRON ABSORPTION
evaluating the usefulness of elemental iron powders, S16–S17 (Jul)
food iron absorption and its importance for design of food fortification strategies, S3–S6 (Jul)
iron absorption from iron-fortified food, S7–S15 (Jul)
iron amino acid chelates as iron fortificants, S18–S21 (Jul)
IRON AMINO ACID CHELATES
iron amino acid chelates as iron fortificants, S18–S21 (Jul)
IRON BIOAVAILABILITY
cereal flour fortification, 391–406 (Dec)
IRON COMPOUNDS
iron absorption from iron-fortified food, S7–S15 (Jul)
iron compounds for food fortification, S50–S61 (Jul)
IRON DEFICIENCY
intervention strategies for improving iron status of young children and adolescents in India, S115–S117 (May)
iron compounds for food fortification, S50–S61 (Jul)
iron fortification in the Americas, S22–S25 (Jul)
prevalence of micronutrient malnutrition worldwide, S46–S52 (May)
staple food fortification with iron, S34–S41 (Jul)
why anemic individuals are anemic, 91–96 (Mar)
IRON DEFICIENCY ANEMIA
evaluating the usefulness of elemental iron powders, S16–S17 (Jul)
IRON FORTIFICATION
iron amino acid chelates as iron fortificants, S18–S21 (Jul)
iron fortification in Central America, S30–S33 (Jul)
iron fortification in the Americas, S22–S25 (Jul)
iron fortification of flours in Venezuela, S26–S29 (Jul)
IRON FORTIFIED FOOD
iron absorption from iron-fortified food, S7–S15 (Jul)
IRON INTAKE
food iron absorption and its importance for design of food fortification strategies, S3–S6 (Jul)

IRON METABOLISM
why anemic individuals are anemic, 91–96 (Mar)
IRON POWDERS
evaluating the usefulness of elemental iron powders, S16–S17 (Jul)
IRON SUPPLY
staple food fortification with iron, S34–S41 (Jul)
ISRAEL
dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)

KIDNEY STONES
kidney stones in patients with low calcium intakes, 212–214 (Jul)

LDL
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
LEPTIN
defining the role of leptin in humans, S30–S34 (Oct)
function of leptin in nutrition, weight, and physiology, S1–S14 (Oct)
leptin and insulin action in the central nervous system, S20–S29 (Oct)
leptin and reproduction, S39–S46 (Oct)
leptin and undernutrition, S56–S67 (Oct)
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
role of leptin in immunology, S35–S38 (Oct)
LEPTIN CONCENTRATIONS
role of leptin in the control of body weight, S15–S19 (Oct)
LEPTIN-RESISTANT STATE
leptin and reproduction, S39–S46 (Oct)
LIPOLYSIS
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
LITHOCHOLIC ACID
intestinal bile acids can bind to and activate the vitamin D receptor, 281–283 (Sep)
LOW BIRTH WEIGHT
effect on fetal growth and outcome of pregnancy, S35–S39 (May)
Indo-US workshop on nutrition and health of women, infants, and children, S132–S138 (May)
multiple micronutrient supplementation in pregnancy, S2–S6 (May)
LOW CALCIUM INTAKE
kidney stones in patients with low calcium intakes, 212–214 (Jul)
LOW-DENSITY LIPOPROTEIN
novel transporters involved in the regulation of sterol absorption and excretion, 30–33 (Jan)
LUNG TISSUE
effect of β-carotene and exposure to cigarette smoke on lungs of ferrets, 88–90 (Mar)

MACROCYTIC ANEMIA
acute *versus* marginal deficiencies of nutrients, 277–280 (Sep)
MACRONUTRIENT AND MICRONUTRIENT DEFICIENCY
improvement of human nutrition using genetically engineered crops, 135–141 (May)
MALNUTRITION
age-related eye disease study (AREDS), 283–288 (Sep)
effect on fetal growth and outcome of pregnancy, S26–S34 (May)
fetal malnutrition and adult chronic disease, S35–S39 (May)
infant feeding styles, S109–S114 (May)
innovative strategy to combat malnutrition in India, S102–S108 (May)
malnutrition and excess mortality in Shangri-La, 59–65 (Feb)
micronutrient deficiency based on results obtained from the National Pilot Program on control of micronutrient malnutrition, S53–S58 (May)
research priorities child and maternal nutrition, S14–S18 (May)
MATERNAL MORTALITY
maternal nutrition, health, and survival, S59–S63 (May)
MEDITERRANEAN DIET
epidemiology and nutritional approaches in using olive oil, 170–176 (Jun)
MELANOPSIN
three vitamins are involved in regulation of the circadian rhythm, 257–260 (Aug)
MENKES AND WILSON DISEASES
understanding copper uptake at the molecular level, 177–186 (Jun)
METABOLIC ACID EFFECTS
development of dental caries due to cheese consumption, 97–103 (Apr)
METABOLIC SYNDROME
glucocorticoids in adipocytes stimulate visceral obesity, 148–151 (May)
MICRONUTRIENT DEFICIENCIES
fortification strategies to combat zinc and iron deficiency, 52–58 (Feb)
micronutrient deficiency based on results obtained from the National Pilot Program on control of micronutrient malnutrition, S53–S58 (May)
micronutrient malnutrition, infection, and immunity, S40–S45 (May)
MICRONUTRIENT INTERVENTIONS
why anemic individuals are anemic, 91–96 (Mar)
MICRONUTRIENT MALNUTRITION
Indo-US workshop on nutrition and health of women, infants, and children, S132–S138 (May)
overview of global situation in health and nutrition in women, infants, and children, S7–S13 (May)

prevalence of micronutrient malnutrition worldwide, S46–S52 (May)
MICRONUTRIENTS
adverse effects of poor micronutrient status during childhood and adolescence, S84–S90 (May)
adverse outcomes of poor micronutrient status in childhood and adolescence, S77–S83 (May)
approaches to intervention among children and adolescents, S118–S125 (May)
control of micronutrient deficiencies in India, S73–S76 (May)
intervention strategies for improving iron status of young children and adolescents in India, S115–S117 (May)
role of micronutrients and microorganisms in the development of immunocompetence, S68–S72 (May)
MICROORGANISMS
role of micronutrients and microorganisms in the development of immunocompetence, S68–S72 (May)
MINERAL BIOAVAILABILITY
iron and calcium bioavailability of fortified foods and dietary supplements, 360–367 (Nov)
MPTP
homocysteine, folate deficiency, and Parkinson's disease, 410–413 (Dec)
MUSCLE FUNCTION
cytokines in regulating protein metabolism and muscle function, 39–51 (Feb)

NET ACID PRODUCTION
elderly women need dietary protein to maintain bone mass, 337–341 (Oct)
NEURAL TUBE DEFECTS
dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)
NEURODEGENERATION
homocysteine, folate deficiency, and Parkinson's disease, 410–413 (Dec)
roles of vitamins E and C on neurodegenerative diseases and cognitive performance, 308–326 (Oct)
NEUROENDOCRINE FUNCTION
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
NEW WORLD PRIMATES
novel intracellular proteins associated with cellular vitamin D action, 209–214 (Jul)
NONALCOHOLIC FATTY LIVER DISEASE (NAFLD)
pathogenesis and the role of antioxidants in nonalcoholic fatty liver disease, 289–293 (Sep)
NONALCOHOLIC STEATOHEPATITIS (NASH)
pathogenesis and the role of antioxidants in nonalcoholic fatty liver disease, 289–293 (Sep)
NOVEL CELLULAR PROTEINS
novel intracellular proteins associated with cellular vitamin D action, 209–214 (Jul)

NUTRIENT DEFICIENCIES
adverse effects of poor micronutrient status during childhood and adolescence, S84–S90 (May)
adverse outcomes of poor micronutrient status in childhood and adolescence, S77–S83 (May)
measurement of nutrition impact of laboratory methods to enhance nutrition research, S126–S131 (May)
NUTRIENT EXCESSES
adverse outcomes of poor micronutrient status in childhood and adolescence, S77–S83 (May)
measurement of nutrition impact of laboratory methods to enhance nutrition research, S126–S131 (May)
NUTRIENT INTAKES
history and future of food fortification in the United States, 15–26 (Jan)
micronutrient deficiency based on results obtained from the National Pilot Program on control of micronutrient malnutrition, S53–S58 (May)
NUTRIENTS
using new dietary reference intakes to assess diets, 267–275 (Sep)
NUTRITION
children's food acceptance patterns, S91–S94 (May)
development of eating behavior and nutrition status, S95–S101 (May)
Indo-US workshop on nutrition and health of women, infants, and children, S132–S138 (May)
infant feeding styles, S109–S114 (May)
innovative strategy to combat malnutrition in India, S102–S108 (May)
NUTRITIONAL QUALITY
improvement of human nutrition using genetically engineered crops, 135–141 (May)
NUTRITION AND INFECTION
role of leptin in immunology, S35–S38 (Oct)
NUTRITION DEFICIENCIES
approaches to intervention among children and adolescents, S118–S125 (May)
NUTRITION EDUCATION
control of micronutrient deficiencies in India, S73–S76 (May)
NUTRITION RESEARCH
research priorities child and maternal nutrition, S14–S18 (May)
workshop on nutrition and health of women, infants, and children, S1 (May)

OBESITY
defining the role of leptin in humans, S30–S34 (Oct)
function of leptin in nutrition, weight, and physiology, S1–S14 (Oct)
glucocorticoids in adipocytes stimulate visceral obesity, 148–151 (May)
obesity is not protective for bones in childhood and adolescence, 27–30 (Jan)

results concerning whether the thermic effect of food is reduced in obesity, 223–233 (Aug)
role of leptin in the control of body weight, S15–S19 (Oct)
thermic effect of food is reduced in obesity (letter to the editor), 295–297 (Sep)
thermic effect of food is reduced in obesity (response from the author), 299–300 (Sep)
OB/OB GENE
leptin and reproduction, S39–S46 (Oct)
OLIVE OIL
epidemiology and nutritional approaches in using olive oil, 170–176 (Jun)
OMEGA-3
n-3 polyunsaturated fatty acids on risk reduction of sudden death, 407–409 (Dec)
OSTEOPOROSIS
elderly women need dietary protein to maintain bone mass, 337–341 (Oct)
OXIDATIVE STRESS
vitamin supplementation used in heart transplant patients, 368–377 (Nov)

PARASITE INFECTIONS
prepregnancy and pregnancy nutrition and its impact on women's health, S64–S67 (May)
PARKINSON'S DISEASE
homocysteine, folate deficiency, and Parkinson's disease, 410–413 (Dec)
PEPTIDE
hepcidin and regulation of dietary iron, 371–374 (Nov)
PHYTATE-CONTAINING LEGUMES
plant-based diets reduces dietary iron and zinc absorption, 127–134 (May)
PHYTOESTROGEN
effects of alcohol, estrogen, and phytoestrogens on high-density lipoproteins, 1–7 (Jan)
PHYTOSTEROLS
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
PLANT-BASED DIET
plant-based diets reduces dietary iron and zinc absorption, 127–134 (May)
PLANT PROTEIN
elderly women need dietary protein to maintain bone mass, 337–341 (Oct)
PLATELET AGGREGATION
modulation of monocyte-macrophage function with α-tocopherol, 8–14 (Jan)
POLYUNSATURATED
n-3 polyunsaturated fatty acids on risk reduction of sudden death, 407–409 (Dec)
POPULATION EXPLOSION
workshop on nutrition and health of women, infants, and children, S1 (May)
POPULATION GENETICS
subtyping of bacterial foodborne pathogens, 201–208 (Jul)
PREBIOTICS
immune-stimulating and gut health–promoting properties of short-chain fructo-oligosaccharides, 326–334 (Oct)
PRE-ECLAMPSIA
maternal nutrition, health, and survival, S59–S63 (May)
PREGNANCY
effect on fetal growth and outcome of pregnancy, S26–S34 (May)
leptin and reproduction, S39–S46 (Oct)
multiple micronutrient supplementation in pregnancy, S2–S6 (May)
PREGNANCY NUTRITION
prepregnancy and pregnancy nutrition and its impact on women's health, S64–S67 (May)
PRENATAL MALNUTRITION
Indo-US workshop on nutrition and health of women, infants, and children, S132–S138 (May)
PRETERM BIRTH
choriodecidual infection and preterm birth, S19–S25 (May)
PROBIOTICS
immune-stimulating and gut health–promoting properties of short-chain fructo-oligosaccharides, 326–334 (Oct)
PROGRESSIVE LIVER FIBROSIS
pathogenesis and the role of antioxidants in nonalcoholic fatty liver disease, 289–293 (Sep)
PROTEIN-ENERGY MALNUTRITION (PEM)
micronutrient malnutrition, infection, and immunity, S40–S45 (May)
overview of global situation in health and nutrition in women, infants, and children, S7–S13 (May)
PROTEIN METABOLISM
cytokines in regulating protein metabolism and muscle function, 39–51 (Feb)
PUBLIC HEALTH
negative impact of antimicrobial use in animals on humans, 261–264 (Aug)
subtyping of bacterial foodborne pathogens, 201–208 (Jul)

REGULATING BODY WEIGHT
function of leptin in nutrition, weight, and physiology, S1–S14 (Oct)
REMEDIAL INTERVENTION
measurement of nutrition impact of laboratory methods to enhance nutrition research, S126–S131 (May)
REPRODUCTION
involvement of inositol in reproduction, 80–87 (Mar)

REPRODUCTION AXIS
leptin and undernutrition, S56–S67 (Oct)
REPRODUCTIVE PHYSIOLOGY
leptin and reproduction, S39–S46 (Oct)
RESTING ENERGY EXPENDITURE
results concerning whether the thermic effect of food is reduced in obesity, 223–233 (Aug)
RETINOIC ACID
effect of β-carotene and exposure to cigarette smoke on lungs of ferrets, 88–90 (Mar)
RETINOID X RECEPTOR
thyroid-stimulating hormone of the anterior pituitary gland, 374–377 (Nov)
RETINOL
influence of dietary fat on β-carotene absorption and bioconversion into vitamin A, 104–110 (Apr)
RHEUMATOID ARTHRITIS
vitamin B_{12} deficiency, tumor necrosis factor-α, and epidermal growth factor, 142–144 (May)
RICKETS
comeback of nutritional rickets, 111–115 (Apr)
RISK AND BALANCE OF DEFICIENCY AND TOXICITY
history and future of food fortification in the United States, 15–26 (Jan)

S-ADENOSYLHOMOCYSTEINE
severe hyperhomocysteinemia caused by alcohol abuse, 215–221 (Jul)
SALMONELLA
negative impact of antimicrobial use in animals on humans, 261–264 (Aug)
SATIETY
effects of carbohydrate on food intake, 155–169 (Jun)
SATIETY CONTROL
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)
SATIETY SYSTEM
leptin and insulin action in the central nervous system, S20–S29 (Oct)
SATURATED FAT
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
SHORT-CHAIN FRUCTO-OLIGOSACCHARIDES
immune-stimulating and gut health–promoting properties of short-chain fructo-oligosaccharides, 326–334 (Oct)
SITOSTANOL
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
SITOSTEROL
trace components of dietary fat on cholesterol metabolism, 349–359 (Nov)
SMALL-BOWEL LYMPHOMA
mortality in patients with celiac disease, 116–118 (Apr)
STAPLE FOOD
staple food fortification with iron, S34–S41 (Jul)
STEATOHEPATITIS
pathogenesis and the role of antioxidants in nonalcoholic fatty liver disease, 289–293 (Sep)
STERILITY
leptin and reproduction, S39–S46 (Oct)
SUDDEN DEATH
n-3 polyunsaturated fatty acids on risk reduction of sudden death, 407–409 (Dec)
SUNSHINE
comeback of nutritional rickets, 111–115 (Apr)
SUPPLEMENTATION
dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)
iron and calcium bioavailability of fortified foods and dietary supplements, 360–367 (Nov)

T-CELL FUNCTION
role of leptin in immunology, S35–S38 (Oct)
TEST WEIGHING
validity of measuring milk intake in infant feeding, 235–251 (Aug)
THERMIC EFFECT OF FOOD (TEF)
results concerning whether the thermic effect of food is reduced in obesity, 223–233 (Aug)
thermic effect of food is reduced in obesity (letter to the editor), 295–297 (Sep)
thermic effect of food is reduced in obesity (response from the author), 299–300 (Sep)
THERMOGENESIS
review of the experimental and epidemiologic data regarding high-protein weight-loss diets, 189–200 (Jul)
THIAMIN
acute *versus* marginal deficiencies of nutrients, 277–280 (Sep)
THYMOCYTES
role of leptin in immunology, S35–S38 (Oct)
THYROID FUNCTION
leptin and undernutrition, S56–S67 (Oct)
THYROID HORMONE
thyroid-stimulating hormone of the anterior pituitary gland, 374–377 (Nov)
THYROID RECEPTOR
thyroid-stimulating hormone of the anterior pituitary gland, 374–377 (Nov)
THYROID-STIMULATING HORMONE
thyroid-stimulating hormone of the anterior pituitary gland, 374–377 (Nov)
TIBET
malnutrition and excess mortality in Shangri-La, 59–65 (Feb)
T-LYMPHOCYTES
zinc nutrition and HIV infection, 69–79 (Mar)

TRANSMETHYLATION
severe hyperhomocysteinemia caused by alcohol abuse, 215–221 (Jul)
TRANSPORT PROTEINS
cellular transporters for zinc, 121–124 (Apr)
TRANSSULFURATION
severe hyperhomocysteinemia caused by alcohol abuse, 215–221 (Jul)
TUMOR NECROSIS FACTOR-α
vitamin B_{12} deficiency, tumor necrosis factor-α, and epidermal growth factor, 142–144 (May)
TYPE 1 DIABETES
supplementing infants with vitamin D might prevent type 1 diabetes, 118–121 (Apr)
TYPE 1 DIABETES MELLITUS
type 1 diabetes mellitus results from decreased insulin production, 182–186 (Jun)

UNDERNUTRITION
leptin and undernutrition, S56–S67 (Oct)
UREMIC MALNUTRITION
malnutrition, inflammation, and atherosclerosis in ESRD, 378–387 (Nov)
URINARY CALCIUM LOSS
review of the experimental and epidemiologic data regarding high-protein weight-loss diets, 189–200 (Jul)
U.S. POLICY
history and future of food fortification in the United States, 15–26 (Jan)

VALIDITY
validity of measuring milk intake in infant feeding, 235–251 (Aug)
VENTRAL HYPOTHALAMUS
leptin and insulin action in the central nervous system, S20–S29 (Oct)
VERTICAL TRANSMISSION OF HIV
zinc nutition and HIV infection, 69–79 (Mar)
VISUAL DISORDERS
age-related eye disease study (AREDS), 283–288 (Sep)
VITAMIN A
influence of dietary fat on β-carotene absorption and bioconversion into vitamin A, 104–110 (Apr)
thyroid-stimulating hormone of the anterior pituitary gland, 374–377 (Nov)
VITAMIN A DEFICIENCY
age-related eye disease study (AREDS), 283–288 (Sep)
VITAMIN B_{12} DEFICIENCY
vitamin B_{12} deficiency, tumor necrosis factor-α, and epidermal growth factor, 142–144 (May)
VITAMIN C
gastric cancer in *Helicobacter pylori*–infected populations when using vitamin C, 34–36 (Jan)
vitamin supplementation used in heart transplant patients, 368–377 (Nov)
VITAMIN D
comeback of nutritional rickets, 111–115 (Apr)
supplementing infants with vitamin D might prevent type 1 diabetes, 118–121 (Apr)
VITAMIN D ACTION
novel intracellular proteins associated with cellular vitamin D action, 209–214 (Jul)
VITAMIN D RECEPTOR
intestinal bile acids can bind to and activate the vitamin D receptor, 281–283 (Sep)
VITAMIN D RESISTANCE
novel intracellular proteins associated with cellular vitamin D action, 209–214 (Jul)
VITAMIN E
vitamin supplementation used in heart transplant patients, 368–377 (Nov)

WEIGHT
role of leptin in the control of body weight, S15–S19 (Oct)
WEIGHT LOSS
review of the experimental and epidemiologic data regarding high-protein weight-loss diets, 189–200 (Jul)
WHEAT FLOUR
iron fortification in Central America, S30–S33 (Jul)
iron fortification in the Americas, S22–S25 (Jul)
iron fortification of flours in Venezuela, S26–S29 (Jul)
WHEAT FLOUR FORTIFICATION
cereal flour fortification, 391–406 (Dec)
WHOLE GRAINS
plant-based diets reduces dietary iron and zinc absorption, 127–134 (May)
WOMEN
dietary folate and the incidence and prevention of neural tube defects, 303–307 (Oct)
WORM INFESTATION
improving iron status of young children and adolescents in India, S115–S117 (May)
WOUND HEALING
peripheral actions of leptin and its involvement in disease, S47–S55 (Oct)

ZINC
cellular transporters for zinc, 121–124 (Apr)
fortification strategies to combat zinc and iron deficiency, 52–58 (Feb)
plant-based diets reduces dietary iron and zinc absorption, 127–134 (May)
ZINC DEFICIENCY
zinc nutrition and HIV infection, 69–79 (Mar)
ZIP
cellular transporters for zinc, 121–124 (Apr)
ZNT
cellular transporters for zinc, 121–124 (Apr)
